SAFE HARBOR STATEMENTS

Forward-Looking Statements

Certain information set forth in this presentation, other than historical statements, contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 that are based, in whole or in part, on current expectations, estimates, forecasts, and projections about the Company's business, and management's beliefs about future operations, results, and financial position. These forward-looking statements can generally be identified by the use of forward-looking terminology, including the terms "believes," "anticipates," "aspires," "expects," "estimates," "seeks," "projects," "intends," "plans," "opportunities," "may," "will" or "should" or, in each case, their negative or other variations or comparable terminology. These statements are not guarantees of future performance and are subject to a number of risk factors, uncertainties, and assumptions. Actual events, performance, or results could differ materially from the anticipated events, performance, plans, or results expressed or implied by such forward-looking statements. Factors that could cause actual results to differ materially from current expectations include, among other things, the impacts of COVID-19 on the global economy and on our customers, suppliers, employees, operations, business, liquidity and cash flows, other general economic conditions and conditions in the particular markets in which we operate, changes in customer demand and capital spending, competitive factors and pricing pressures, our ability to develop and launch new products in a cost-effective manner, our ability to realize synergies from newly acquired businesses, and our ability to derive expected benefits from restructuring, productivity initiatives, liquidity enhancing actions, other cost reduction actions and the other risks described in the section entitled "Risk Factors" in our most recent annual report on Form 10-K, which can be accessed under the "SEC Filings" link of the "Investor Info" page of our website at www.Gibraltar1.com. The forward-looking statements included in this presentation are made as of the date hereof, and we undertake no obligation to update any forward-looking statement, whether as a result of new information, future events or otherwise, except as may be required by applicable law or regulation.

Growth Plan and Projections

This presentation contains information regarding our growth plans, projections and estimates of future financial information. These plans, projections and estimates are forward-looking statements and should not be considered guarantees of future performance, representations by any person that any results contained therein will be achieved or necessarily indicative of future results. The assumptions and estimates underlying our plans, projections and estimates are inherently uncertain and are subject to a number of risk factors, uncertainties, and assumptions described above under "Forward-Looking Statements" that could cause our actual results to differ materially from our plans, projections and estimates contained herein. Unless otherwise noted, the plans, projections and estimates discussed in this presentation do not include the potential impact of any business combinations, acquisitions, divestitures, strategic investments and other significant transactions that may be completed after the date hereof.

SAFE HARBOR STATEMENTS

Adjusted Financial Measures

To supplement Gibraltar's financial information presented on a GAAP basis, Gibraltar also presented certain adjusted financial measures in this presentation, including adjusted operating margin, adjusted earnings per share (Adjusted EPS) and adjusted earnings before interest, taxes, depreciation and amortization (Adjusted EBITDA). Adjusted financial data excludes special charges consisting of restructuring costs primarily associated with 80/20 simplification initiatives, senior leadership transition costs, acquisition-related costs, a reclassification of hedging income, and other reclassifications. Interest, taxes, depreciation and amortization can vary significantly between companies due in part to differences in accounting policies, tax strategies, levels of indebtedness and interest rates. Management believes that excluding these items provides insight into the underlying results of operations and facilitates comparisons between other companies. Adjusted EBITDA is also a useful measure of the Company's ability to service debt and is one of the measures used for determining the Company's debt covenant compliance. The Company believes that the presentation of results excluding special charges provides meaningful supplemental data to investors, as well as management, that are indicative of the Company's core operating results and facilitates comparison of operating results across reporting periods as well as comparison with other companies. Special charges are excluded since they may not be considered directly related to the Company's ongoing business operations.

Adjustments to the most directly comparable financial measures presented on a GAAP basis are quantified in the adjusted financial measures reconciliation excluding special charges provided in the adjusted financial measures reconciliation in the appendix of this presentation. Non-GAAP measures referenced in this presentation also include estimates of future adjusted operating margin, Adjusted EPS and Adjusted EBITDA. Such forward-looking non-GAAP measures may differ significantly from the corresponding GAAP measures, and the Company is not providing quantitative reconciliations of expected adjusted operating margin, Adjusted EPS and Adjusted EBITDA for future periods to the most directly comparable measures prepared in accordance with GAAP because the Company is unable to provide specific quantifications of the amounts necessary to reconcile these measures without unreasonable effort as certain information necessary to calculate such measures on a GAAP basis is unavailable, highly variable and unpredictable or dependent on the timing of future events outside of the Company's control. Any adjusted measures in this presentation should not be viewed as a substitute for the Company's GAAP results, and may be different than adjusted measures used by other companies.

Market and Industry Data

Certain information contained in this presentation concerning our industries and the markets in which we operate is based on publicly available information from industry, research organizations and other third-party sources, management estimates derived from publicly available information from industry, research organizations and other third-party sources, as well as data from our internal research. This information is based on assumptions made by us upon reviewing such data and our knowledge of such industries and markets, which we believe to be reasonable. This data involves a number of assumptions and limitations, and you are cautioned not to give undue weight to such estimates.
