Non-GAAP Financial Data
To supplement Gibraltar’s consolidated financial statements presented on a GAAP basis, Gibraltar also presents certain adjusted financial data in this presentation. Adjusted financial data excluded special charges consisting of gain on sale of assets, restructuring costs, acquisition-related costs and other reclassifications. These adjustments are shown in the Non-GAAP reconciliation of adjusted operating results excluding special charges provided in the financial statements that accompany the earnings news release. The Company believes that the presentation of results excluding special charges provides meaningful supplemental data to investors, as well as management, that are indicative of the Company’s core operating results and facilitates comparison of operating results across reporting periods. These adjusted measures should not be viewed as a substitute for our GAAP results.
