SAFE HARBOR STATEMENTS

Forward-Looking Statements

Certain information set forth in this presentation, other than historical statements, contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995 that are based, in whole or in part, on current expectations, estimates, forecasts, and projections about the Company’s business, and management’s beliefs about future operations, results, and financial position. These statements are not guarantees of future performance and are subject to a number of risk factors, uncertainties, and assumptions. Actual events, performance, or results could differ materially from the anticipated events, performance, or results expressed or implied by such forward-looking statements. Before making any investment decisions regarding our company, we strongly advise you to read the section entitled “Risk Factors” in our most recent annual report on Form 10-K which can be accessed under the “SEC Filings” link of the “Investor Info” page of our website at www.Gibraltar1.com. We undertake no obligation to update any forward-looking statement, whether as a result of new information, future events or otherwise, except as may be required by applicable law or regulation.

Adjusted Financial Measures

To supplement Gibraltar’s consolidated financial statements presented on a GAAP basis, Gibraltar also presented certain adjusted financial data in this presentation. Adjusted financial data excluded special charges consisting of restructuring costs primarily associated with the 80/20 simplification initiative, senior leadership transition costs, debt repayment costs, and other reclassifications. These adjustments are shown in the reconciliation of adjusted financial measures excluding special charges provided in the supplemental financial schedules that accompany the earnings news release. The Company believes that the presentation of results excluding special charges provides meaningful supplemental data to investors, as well as management, that are indicative of the Company’s core operating results and facilitates comparison of operating results across reporting periods as well as comparison with other companies. Special charges are excluded since they may not be considered directly related to the Company’s ongoing business operations. These adjusted measures should not be viewed as a substitute for the Company's GAAP results, and may be different than adjusted measures used by other companies.
